+ ABOUT ME

After three years as a Maintenance Technician in the electrical department, I made the decision to transition into the IT field due to a lack of enjoyment in my previous role. I pursued and successfully completed my Bachelor of Computer Application degree. During my academic journey, I diligently developed proficiency in various programming languages, including HTML, CSS, JavaScript, and Python. Through dedicated study and hands-on practice, I have acquired a strong foundation in these languages, which are fundamental to web development. I am confident in my ability to utilize these skills to craft innovative solutions and applications in the IT industry.
